

MTI COLLEGE

How Our Students Are Doing

In compliance with the Student-Right-To-Know provision of the Higher Education Act of 1965, as amended, MTI College wants you to know how our students are doing in terms of job placement, student loan repayment, retention and graduation. These rates are based on information that is collected annually and made available by July 1st.

Job Placement Rate (All Students)

MTI uses two rates to monitor job placement - unadjusted and adjusted. The rates are based on the population of all students who are placed in their field of study or who advance in jobs related to their field of study while they are in attendance or after they have graduated from MTI. The rates below are based on the award year July 1, 2018 to June 30, 2019.

	Unadjusted	Adjusted
MTI	72%	97%
Paul Mitchell	74%	96%
Combined	73%	97%

Final placement rates as of January 3, 2020

Unadjusted Rate – represents the percentage of total graduates who obtain employment in or related to their field of study. The unadjusted rate is calculated by dividing the total number of graduates placed in their chosen or related field of study by the total number of graduates.

- The population of placed graduates includes students who are placed in their field of study or who advance in jobs related to their field of study while they are in attendance or after they have graduated from MTI.
- The unadjusted rate is based on the award year July 1 to June 30. The rate is typically calculated in January immediately following the end of the award year. This allows students who graduate at the end of the award year time to obtain employment so they can be included in the calculation. In addition, this enables the college to ensure that all graduate files that should be included in the calculation are closed out and processed.

Adjusted Rate – represents the percentage of graduates actively looking for work who obtain employment in or related to their field of study. The adjusted rate is calculated by dividing the total number of graduates placed in their chosen or related field of study by the total number of graduates less the number of graduates who declined to activate with the Career Services department and the number who were deactivated from using MTI’s career services.

- The population of placed graduates includes students who are placed in their field of study or who advance in jobs related to their field of study while they are in attendance or after they have graduated from MTI.
- The following individuals are not included in the calculation: graduates who decline activation or are deactivated by the college because they are: 1) not looking for work, 2) continuing their education, 3) choosing not to pursue licensure when it is required for employment, 4) unable to be contacted; 5) employed, but the college cannot verify their employment.
- The adjusted rate is based on the award year July 1 to June 30. The rate is typically calculated in January immediately following the end of the award year. This allows students who graduate at the end of the award year time to obtain employment so they can be included in the calculation. In addition, this enables the college to ensure that all graduate files that should be included in the calculation are closed out and processed.

Student Loan Cohort Default Rate

The cohort default rate (CDR) represents the percentage of federal student loan borrowers who default or fail to repay their student loans within a specified period of time after entering repayment. A low CDR means that more student borrowers are paying off their loans. The rates are based on a three-year period of time.
